PROFESSIONAL PROFILE

Systems Engineer and Chemical Engineer focused on designing AI-powered systems to automate operations, consolidate fragmented data, and solve problems that traditional methods leave broken. Track record at DiDi, OPPO, and Concentrix building single-source-of-truth ecosystems, developing AI agents for operational analysis, and designing platforms that close performance gaps at scale — including QA Hero Academy (gamified training platform) and Claude University (hands-on AI training for non-technical teams). Combines Python, SQL, Power BI, and AI tooling to transform manual, fragmented processes into clean, automated workflows.

PROFESSIONAL EXPERIENCE

DiDi Global

CX & AI Enablement Sr Analyst

Bogotá D.C.
April 2026 – Present

- Building and maintaining AI-powered systems that transform customer interaction data into actionable business intelligence across multiple markets (Brazil, Colombia, Mexico, Egypt).
- Designing and developing **QA Hero Academy**, a scalable full-stack software platform built with AI (Claude Code). Features include real-time dashboards, adaptive training modules, live simulations, interactive quizzes, leaderboard, badge system, and data integrations — all architected from wireframes to production code to drive measurable CSAT improvement and close training gaps across BPO partners.
- Created and facilitating **Claude University**, a recurring hands-on program where non-technical colleagues learn to apply AI tools to their daily operations. Running across the Colombia operation, with expansion to other LATAM markets under evaluation.
- Developing AI-powered solutions designed to generate measurable value for the department — tools and platforms (like QA Hero Academy) that optimize operations, reduce costs, and position the team as a revenue-enabling function within the organization.
- Conducting discovery sessions with internal stakeholders across LATAM, translating operational problems into structured requirements and replicating validated AI/analytical projects across new markets.

DiDi Global

CX Quality Senior Analyst — QA Operations

Bogotá D.C.
August 2025 – April 2026

- Designed and implemented a centralized reporting ecosystem in Power BI, merging 5+ disparate data sources and dashboards into a single integrated view, eliminating information silos and enabling precise Week-over-Week performance tracking.
- Developed Python scripts to automate extraction, filtering, and consolidation of massive datasets from multiple sources, replacing hours of manual data handling with reliable, repeatable pipelines.
- Engineered custom AI agents for automated reporting and deep dive analysis, accelerating root-cause identification in operational data and enabling faster, data-backed decision-making.
- Performed comprehensive process mapping and customer journey analysis to identify UX friction points, delivering data-backed insights to the CX Process team for workflow re-engineering.
- Conducted cross-platform data audits to ensure consistency and accuracy across all reporting tools, guaranteeing that auditing standards were correctly applied to operational metrics.
- Oversaw vendor audit compliance and facilitated calibration sessions to align evaluation criteria, executing strategic action plans that directly improved CSAT and QA scores.

Multiempleos / Sky Friend (Official Distributor for OPPO Colombia)

BI Data Analyst

Bogotá D.C.
January 2025 – August 2025

- Built Power BI dashboards for detailed tracking of commercial expenses vs. monthly budget, enabling strategic financial decisions across the sales organization.
- Conducted weekly analysis of official sales data from retail chains (Alkosto, Éxito, Falabella), generating sales, inventory, and projection reports that informed go-to-market strategies.

- Managed and automated commission calculations for sales teams (managers, supervisors, promoters), handling values exceeding COP \$1,000M with accuracy across sales targets and achieved results.
- Optimized the corporate bonus delivery and legalization process, **reducing outstanding debt from COP \$379M to just COP \$12M** through rigorous payment control and follow-up — a 97% reduction.

Concentrix S.A.S
Bilingual Training and Quality Supervisor

Bogotá D.C.
August 2023 – January 2024

- Led a team of 8 evaluators, consistently exceeding weekly targets through data-driven coaching and interactive KPI dashboards.
- Automated operational workflows using Excel VBA macros, significantly increasing team efficiency and reporting speed.
- Executed strategic action plans based on data analysis to address service gaps and enhance campaign effectiveness.

Previous Roles (2021–2023): Senior Quality Analyst & Customer Service Advisor — Focused on call audit analysis, trend identification, service script optimization, and data-driven training design.

EDUCATION

Systems Engineering — EAN University, Bogotá	Jun 2019 – Nov 2023
Chemical Engineering — EAN University, Bogotá	Jan 2017 – Nov 2021

COMPLEMENTARY TRAINING & CERTIFICATIONS

Data Analysis Specialization — Netzun & San Ignacio University (Miami) Statistics, Python, R, Business Intelligence, SQL, and cloud computing.	Jul – Aug 2024
Full Stack Web Development — Udemy HTML5, CSS, JavaScript, SCSS, PHP, MySQL, and database management.	Feb – Jul 2024

SKILLS

Technical: Power BI | Python | SQL | AI Agents & Prompt Engineering | Power Query | Advanced Excel & VBA | ETL Processes | Data Visualization | HTML/CSS/JavaScript | Figma | Git & GitHub | Microsoft Office

Core Strengths: Process Automation Design | System Architecture for Operations | Data Consolidation & Single Source of Truth | AI Integration in Business Workflows | Training Program Design | Cross-functional Communication | Analytical Problem Solving

HIGHLIGHTED PROJECTS

QA Hero Academy — DiDi | Scalable full-stack software platform built end-to-end with AI (Claude Code). Real-time dashboards, adaptive training modules, live simulations, quizzes, leaderboard, badge system, and data integrations — connecting QA audit results to personalized learning paths for BPO agents.

Claude University — DiDi | Weekly hands-on AI training program for non-technical teams, teaching practical AI tooling application for daily operations.

Audit Automation — Concentrix | Automated audit tracking system using Excel and VBA, consolidating data from multiple sources and generating visual reports for management.

Inventory System — Famoc Depanel | Graduation project: Python and SQL-based CRUD system for furniture inventory management.
